Help Save A Life

Registering to be a bone marrow donor is easy and painless.

**No surgery is required, you will not get sick,
And it will not reduce your life span.**

**The first step involves a saliva sample taken along
the inside of your mouth with a cotton swab.**

These patients are waiting for someone like you to become a donor so they can have another chance at life, and 6 of them are children! The more people there are in the bone marrow registry, the more likely leukemia patients will find a match.
